

# Annapurna North Base Camp Trek

## Trip Overview

Annapurna North Base Camp Trek has fewer travelers and is full of wilderness. Nepal trekking trails for the trekking lover are quite fascinating, as the unique landscapes never fail to amaze them. Nevertheless, the trail of the Annapurna North Base Camp is difficult but at the same time thrilling and exciting. Annapurna North Base Camp is a remote and less popular trekking trail, but nowadays it is gaining attention among adventure trekkers due to its wild beauty.

The route was first completed by Maurice Herzog in 1950. The northwest view is flawlessly seen on the trail from Mirisati Khola to Annapurna North Base Camp. The view is mesmerizing, with shimmering glaciers, mountains, glimmering high mountains, and a deep valley. The magnificent view of the Annapurna North Base Camp, Nilgiri, Tilicho Peak, and the grand Annapurna range from the first French base camp is a fantastic sight to see.

The trek to the Annapurna base camp is different from other trekking trails in the Annapurna range. Thus, trekking through this trail is mainly for adventure seekers and will give you a different feel than trekking in Nepal.
